

## The Little Sun Project

The Little Sun is a portable solar lamp being provided to impoverished and displaced women and girls in Ethiopia as part of an emergency non-food dignity kit. The solar lamp provides economical and safe light, allowing a woman or girl to study at night, move in the dark, prepare meals or care for a family member in their shelter.

The Little Sun Project is an example of how a small thing can make a big difference to the lives of women and girls. It is an affordable charitable gift with a huge impact.

You can see the Little Sun lamps in the photo above. It has been designed after Ethiopia's Meskel Flower.

The following link provides some background information:
